AN EVENT FOR EXCELLENCE

Transforming clinical practice, GMI International Summit 2025 main axis

Dr. Simón Pardiñas & Patricia Merino, GDEntalk coordinators, together with Dr. Juan López-Quiles, GMI International Summit 2025 Scientific Coordinator.

GMI International Summit 2025 is outlined as one of the essential events of the year for professionals in Implantology and bone regeneration. The event will be held on May 2nd and 3rd at the World Trade Center in Barcelona, bringing together national and international experts in an environment designed for learning and clinical excellence.

Dr. Juan López-Quiles, event Scientific Coordinator, has shared in one of the last episodes of GDEntalk the ins and outs of the creative process to design a Congress of this magnitude.

AN EVENT FOR EXCELLENCE

According to Dr. López-Quiles, one of the main differential values of the GMI Summit'25 is the quality of the speakers: "All of them are world-class. A balance has been sought between national and international speakers; between basic scientific bases and new technologies applied to Implantology; and between novelty and experience. For this reason, among the outstanding speakers are **Dr. Mariano Sanz, Dr. Ramón Gómez Meda, Dr. Juraj Brozović and Dr. Luca de Stavola**, recognised worldwide speakers in their respective specialties.

The final objective is clear: that the assistants can transfer the acquired knowledge to their daily clinical practice.

For this, the congress has been designed with a direct, interactive and agile approach, ensuring that the contents are easy to assimilate and apply.

SEVEN HANDS-ON COURSES LED BY PRESTIGIOUS UNIVERSITIES LECTURERS

Programs design seeks balance between theory and practice, combining hands-on sessions with keynote lectures. "We have structured an intense and short program of presentations, direct and interactive between lecturers and assistants. We want it to be agile, concrete and easy to retain, so that participants make the most of the experience," says Dr. López-Quiles.

But the GMI Summit'25 not only brings together renowned speakers, but also has the collaboration of some of the most prestigious Universities in the field of Implantology and bone regeneration.

Among them:

- **Barcelona University (UB):** with 2 Hands-on Courses based on Perimplant diseases & digital implantology applied to Dental Clinic Management. with **Dra. Marta García, Dr. Rui Figueiredo, Dr. Carles Subirà & Domènec Huguet.**
- **Catalonia's International University (UIC):** training on immediate implants & advanced regeneration protocols, with **Dr. Pau Altuna, Dr. Pau Galbán & Dr. Marc Quevedo.**
- **Alfonso X El Sabio University, Madrid (UAX):** digital planning in implantology & surgery splints design, with **Dra. Ana Boquete.**
- **La Salle – EDE University, Madrid:** focused on post-extraction alveolus management & immediate implant, with **Dr. Juan Carlos Vara & Dr. Juan Delgado.**
- **Complutense University, Madrid:** based on maxillary sinus surgical management, its atrophies & complications, with **Dr. Carlos M. Cobo Vázquez & Dr. Pedro Molinero Mourelle.**
- **Catholic University, Valencia:** about transcrestal sinus approach for implant placement in atrophic sinuses, with **Dr. Javier Barberá & Dr. Javier Villanueva.**
- **Oporto University, Portugal:** Hands-on Course on simplifying implant-supported prosthetic & emergency profile, with **Dr. Pedro Ferrás Fernandes & Dr. Manuel Sampaio-Fernandes.**

"These Hands-on Courses are designed so each Attendee can apply the theoretical knowledge in their interest area" Scientific Coordinator explains.

SCIENTIFIC ADVANCES WITH REAL IMPACT

Bone regeneration & periimplantitis treatment are two of the main topics of the Summit. "These are two issues of great relevance and interest for the implantologist. At GMI Summit we will know where Implantology is heading in these fields," says Dr. López-Quiles.

Why you cannot miss this important Scientific Event? Dr. López-Quiles sends a clear message for those Professionals who have not yet registered or doubt whether to attend the GMI Summit'25 in Barcelona: "We have managed to bring together the world leaders in Implantology to deal with the two most interesting topics of today with an approach based on scientific evidence. It is a face-to-face theoretical-practical program, complete, concrete and interactive, designed for the maximum use of the attendees." ●
